## HANDLING, STORAGE AND MINERAL CONCENTRATE BLENDING SERVICES FOR WESTERN EUROPE

*Impala Terminals offers an extensive, versatile, asset-based, multimodal warehousing and logistics network worldwide. With 1,600 employees around the world, we own and operate ports, storage facilities and heavy logistics assets such as barges, to provide world-class logistics solutions to our clients.*

*Specialising in bulk dry and liquid cargoes, breakbulk, general cargo and containers, our global infrastructure investments have been designed to provide multimodal end-to-end services to customers including onward container freight services.*

### STRATEGIC TERMINAL LOCATION

In Spain, our new terminal in the Andalusian port of Huelva is quickly establishing itself as a strategic gateway for commodities in Europe. The port of Huelva is the main outlet for mineral concentrate produced in the Iberian Pyrite belt and our terminal is strategically located to bring these Spanish products to the global markets.

The Huelva terminal is a best-in-class facility for the reception, storage, blending and export of minerals and metal concentrates, able to handle approximately 1 million tonnes of import and export product per year.

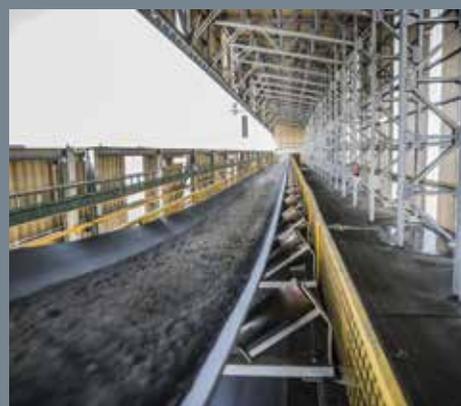

### LEADING CAPACITY

The terminal has a static capacity in covered and independent warehouses of 240,000 metric tonnes. Product is received by 100-120 trucks a day whereby it is weighed and automatically sampled before being stored or blended for export.

The terminal can operate 24 hours a day, 7 days a week and accept up to Panamax size vessels, exports product via a newly expanded 550-metre private berth. Our quayside ship loader can load product at a speed of up to 1,200 metric tonnes an hour.

The project is a hallmark of our operational excellence, with the most advanced equipment for rapid product handling and high standards for health, safety and the environment.
